

Cybersecurity Resilience Program

Continuous Protection & Resiliency
for Whatever Comes Your Way

Stratascale's Cybersecurity Resilience Program provides continuous protection and readiness against evolving cyber threats. Through a single, streamlined program you can ensure that your defenses are fortified, compliance is maintained, and incident response capabilities are always on deck.

Annual Penetration Test

Go beyond standard testing to fortify your defenses. We'll help you take an offensive approach to pentesting that is informed by the latest security research and designed to adapt to the evolving landscape of cyber threats.

Cybersecurity Controls Assessment

Reinforce stakeholder trust and reduce risk by ensuring alignment to key regulatory standards like NIST, PCI-DSS, and ISO 27001. Work with our GRC practitioners to meet compliance standards while aligning goals to broader security efforts and business strategies.

Incident Response Retainer

Accelerate recovery from cyber events. With priority access to battle-tested IR teams, and options for table-top exercises to prepare your staff, you benefit from comprehensive services that translate into quicker and more effective responses, minimizing impact.

Why Stratascale?

Practical. Pragmatic. Practiced.

Stratascale services are designed and delivered by experienced practitioners, based on real-world scenarios. Not only does this mean you have 24/7 access to battle-tested talent in the face of a cyber event, but a partner to help you create strategic advantage through proven cybersecurity resilience services. We're your cybershield, securing your digital future.
